

**NEPTUNE STATIC MATERIAL HANDLING HOSE**

[www.buchananrubber.com](http://www.buchananrubber.com)

**FLEXLITE**

# FLEXLITE

### **Competitive offering construction:**

- thinner tube wall adjacent to helix limits useful wear life
- lost productivity and increased man hours spent changing out worn hoses means increased costs
- helix becomes part of wear area resulting in uneven tube wear and potential for blowout

### **New Flexlite Neptune Static construction:**

- consistent tube wall providing longer wear life
- longer wear means increased productivity and less down time leading to decreased costs
- static wire positioned for maximum protection against breakage while maintaining intimate contact with tube
- increased flexibility with smooth interior wall for optimum flow, throughout the entire life of the hose
- clear tube allows visual confirmation of material flow
